YUDA DWI PUTRA

SYSTEM & BUSINESS ANALYST | CORE BANKING & TREASURY

Jakarta, Indonesia | yudadwiputra@gmail.com | +62 895 2521 4959 | **ISTQB® Certified Tester (Foundation Level)**

SUMMARY

With 6 years 7 months in software delivery for banking and financial services, including 5 years at PT Bank Mandiri on the KOPRA wholesale banking platform. Strong hands-on exposure to core banking and treasury domains: branch and host transactions (BDS, Host/AS400), account and ledger posting, multi-currency and Non-IDR accounts, **FX (e-FX)**, remittance, custody, escrow, cash management, balance forecasting, trade finance, and BI-FAST payments. ISTQB® Certified Tester (Foundation Level). Translates complex banking business processes into clear system designs and functional specifications, covering BRD, as-is / to-be process flows, user stories, and acceptance criteria, then validates them end to end across digital channel, middleware, host, and H2H/API integrations.

PROFESSIONAL EXPERIENCE

Business Analyst, PT Adi Data Informatika – TNI AL (TABPLIN) **Aug 2026 - Present**

- Act as Business Analyst for the TABPLIN Modernization program with TNI AL (Indonesian Navy). The program migrates a 1987 text-based savings system into a web platform serving 112 accounts and around 80,000 members, with PT Bank Mandiri as the settlement bank.
- Reverse-engineered the legacy savings ledger from the original source code to document the **interest accrual formula** (daily basis, leap-year divisor handling), interest tax rules, and deposit / withdrawal posting logic as the definitive reference for the new system.
- Designed end-to-end flows for **payroll auto-debit collection, account inquiry, account registration and maintenance, and disbursement**, including the API integration model with PT Bank Mandiri and the data migration scope (closing balance plus recent transaction history).
- Elicit and analyze business requirements through workshops and interviews with TNI AL stakeholders, translating existing manual and legacy processes into modernized system flows.
- Produce the business analysis artifacts that serve as the single reference for development and QA: BRD, as-is / to-be process flows, user stories, and acceptance criteria.
- Map end-to-end business processes and system interactions, identifying integration points, data requirements, and control points across modules.
- Facilitate requirement walkthroughs, change request impact analysis, and sign-off with business owners to keep scope, timeline, and expectations aligned.
- Support UAT preparation and execution with TNI AL users, covering test scenario review, defect triage, and validation that delivered functionality meets the agreed business requirements.

System Analyst, PT Adi Data Informatika – PT SMI (Sarana Multi Infrastruktur) **Aug 2025 - Aug 2026**

- Bridge business needs and technical solutions by translating requirements into clear system designs and functional specifications for enterprise clients, including PT Sarana Multi Infrastruktur (PT SMI).
- Gather and analyze business and functional requirements directly with stakeholders, including for the Integrated Operational & Self-Service (Travel Agent) system for PT SMI.
- Create system analysis documentation (BRD, user stories, and acceptance criteria) to translate business needs into actionable specifications for the development team.
- Designed a system interaction sequence diagram for the Travel Request Workflow, mapping the end-to-end business travel (Perjalanan Dinas) process from request submission through approval and booking.
- Collaborate with Product Managers, UI/UX, and Development teams during solution design; support backlog refinement, sprint planning, and project discussions.
- Perform impact analysis for change requests and support the QA team during testing validation and UAT, ensuring solutions align with business objectives and quality standards.

Senior Quality Assurance, PT Adi Data Informatika – PT SMI (Sarana Multi Infrastruktur) **Jan 2025 - Jul 2025**

- Developed and implemented comprehensive test strategies; designed detailed test plans, test cases, and scenarios based on requirements.
- Performed functional, integration, regression, user acceptance, and performance testing; tracked defects using Azure and Jira.
- Led QA efforts on complex projects, coordinated testing across teams, and mentored junior QA members on test design and best practices.

Quality Assurance Leader, PT Bank Mandiri (Persero) Tbk. – Wholesale Banking **May 2022 - Dec 2024**

- Lead the QA team for the KOPRA wholesale banking product line covering **cash management, trade finance, value chain financing, guarantees, and FX**, managing defects from discovery through to successful resolution on Enterprise Global and High-Visibility initiatives.
- Validated end-to-end transaction flows between the digital channel and the **core banking host (BDS / AS400)**, confirming account, balance, and posting integrity across front-end, middleware, and core ledger, including the KOPRA 3.0.1 Branch Transaction alignment to the New BDS.
- Owned QA for **treasury-related releases**: Revamp e-FX, Non-IDR Giro, Balance Forecasting, and QR Code Bank Garansi, verifying rate handling, currency conversion, limit controls, and cut-off behaviour.
- Managed all aspects of QA, from strategy and approach through test planning, test automation, and manual execution; collaborated with the Test Data Lead on test data covering corporate customer hierarchies, account structures, and approval matrices.
- Advocated automation and secure software practices; led, mentored, and coached junior staff as the team's go-to resource for **core banking validation**.

Quality Assurance Coordinator, PT Bank Mandiri (Persero) Tbk. **Apr 2021 - Apr 2022**

- Analyzed requirements and produced functional specifications for wholesale banking features: **escrow accounts, H2H integration codes, online onboarding, OOB value chain approval matrices, and BI-FAST payments**.
- Built test cases and test plans from those specifications; executed internal testing prior to UAT, validating transactions against **core banking host responses** and reconciling results with back-office data.
- Performed automation and manual testing, coordinated defect resolution with developers, and produced test reports validating the final product against requirements.

Quality Assurance Tester, PT Bank Mandiri (Persero) Tbk. **Feb 2020 - Mar 2021**

- Tested core banking-facing features: **transaction history, balance history, multi-currency grouping, online custody, SSO e-FX, and online remittance tracking**.
- Validated **H2H / API integrations** with third-party systems (Limas, SAMS) and supported the SCM database server migration from Single Node OVM to RAC OVM.
- Created test scripts, logged defects with clear reproduction steps and severity using Azure, and prepared release documentation through to production release.

PROJECTS

PT Adi Data Informatika – TNI AL **Aug 2026 - Present**

- TABPLIN (Tabungan Disiplin) Modernization - Documented the legacy savings ledger from the original source code (interest accrual, tax rules, posting logic); designed the end-to-end flows for payroll auto-debit collection, account inquiry, account maintenance, disbursement, and refund, plus the API integration

PT Adi Data Informatika – PT Sarana Multi Infrastruktur (SMI) **Jan 2025 – Aug 2026**

- Integrated Operational & Self-Service (Travel Agent) – PT SMI: system analysis and requirements gathering for the Perjalanan Dinas (business travel) module; produced BRD, user stories, and acceptance criteria; designed the Travel Request Workflow sequence diagram.
- Employee Condition Monitoring System (ECMS), PT SMI – 13 sprints (QA).

PT Bank Mandiri (Persero) Tbk. – KOPRA Super Apps **May 2022 - Dec 2024**

- KOPRA 3.0.1 Branch Transactions (New BDS Alignment); Enhancement & Stabilization of Kopra Mobile Application; Enhancement Kopra LAJU & OOB Value Chain; Single Sign-On Experience Kopra.
- Relationship-Based Cross Selling – CBIC Alignment; Modernisasi Contact Center Fase 2 – Integrasi Livechat KOPRA 2.4; Revamp e-FX; QR Code Bank Garansi; Bank BO Enhancement: OOB Kopra Cash Management.
- Online Onboarding MFSCM & Mandiri Global Trade; BBO – Aplikasi Jaminan Online; Financial Dashboard Enhancement; Balance Forecasting; Digitalisasi Cash Pickup & Cash Delivery; production issue handling (Jan & Feb 2023).

PT Bank Mandiri (Persero) Tbk. – KOPRA Super Apps **Apr 2021 - Apr 2022**

- Kopra LAJU Improvement (Matrix); Virtual Assistant 2.0; Other Bank (External Account) Information; OOB Product Improvement (Token Multi); Giro Online Non-IDR.
- SSO – Mandiri Reconciliation Portal & Hospital Application Solution; Online Onboarding Transaction Product; Escrow Account & H2H Code; Approval Matrix OOB Value Chain; Independent User & User Management; CR BI FAST; KOPRA Phase 2.3.

PT Bank Mandiri (Persero) Tbk. – KOPRA Super Apps **Feb 2020 - Mar 2021**

- Transaction History, Balance History, Currency & Grouping; Online Custody; SSO eFX; Online Helpdesk; Online Remittance Tracking; 3rd-party integrations (Limas, SAMS).
- SCM DB server migration (Single Node OVM to RAC OVM); Online Onboarding Value Chain; KOPRA Anchor Client Community Solution via H2H/API; Wholesale Digital Platform; New MCM Phase 2 Releases 3 & 5; Mandiri New MCM 2.4; Card Vending Machine.

SKILLS

- **Banking Domain:** Core Banking (BDS, Host/AS400, account & ledger posting, interest accrual, branch transactions); Treasury & FX (e-FX, multi-currency & Non-IDR accounts, rate handling, balance forecasting); Cash Management (collection, cash pickup & delivery, escrow); Payments & Remittance (BI-FAST, H2H/API, remittance tracking); Trade Finance & Guarantees (Mandiri Global Trade, Bank Garansi); Supply Chain Financing (MFSCM / Value Chain); Custody
- **System Analysis:** Requirements Gathering & Analysis, BRD / User Stories / Acceptance Criteria, Business Process Analysis, System Design & Functional Specifications, Sequence & Workflow Diagramming, Impact Analysis
- **Testing:** Manual Testing (Functional, Regression, Smoke, SIT, UAT), API Testing (Postman), SQL & Database Testing (DBeaver, SQL Developer), Cross-browser & Cross-platform Testing, Web & Mobile App Testing, BDD Test Case
- **Delivery & Collaboration:** SDLC (Agile & Waterfall), Backlog Refinement, Sprint Planning, Stakeholder Communication, Defect Lifecycle Management, Test Metrics & Reporting, Risk-based Testing & Prioritization
- **Tools:** Host/AS400 – Core Banking Validation, BDS, Cleopatra, Jira, Azure DevOps, Git, Postman, DBeaver, SQL Developer, FileZilla/SFTP

EDUCATION

Bachelor's Degree in Information Systems **2020 - 2021**

Universitas Nusa Mandiri

Diploma in Information Systems **2016 - 2019**

Universitas Bina Sarana Informatika

ADDITIONAL INFORMATION

- **Languages:** Indonesian, English
- **Certifications:** ISTQB® Certified Tester – Foundation Level (Certificate No. 23-CTFL-227561-12, May 2023); Kuliah Professional Quality Assurance – PT Ace Konsultan Indonesia (2023); Professional Certificate in Agile & SCRUM; Agile Project Management (Agile, Scrum, Kanban & XP); Master in Product Management (IT); PMO 2.0: Project Management Office Blueprint; The Ultimate SQL Bootcamp; QA Metrics & KPIs; Defect Management & QA Reporting; MCP for Leaders: Architecting Context-Driven AI; Cybersecurity 101 & CyberSecurity Bootcamp (Udemy, 2025)
- **Awards/Activities:** 1st Place Winner – Monthly Assessment (Jun, Sep, Oct 2023); Exploratory Testing Winner (Aug 2023); 1st Place – Defect Hunter (Oct 2024); 1st Place – Performance Tester (Dec 2024); 1st Place – Defect Hunter Adidata (2025)
